About the stove

The star of our glass fronted steel range, the Thea 5s with its clean cut, straight lines and convection technology has a powerful heat output of up to 8KW yet can normally be installed without the need for additional ventilation as it has been independently tested and approved as a Nominal 5KW.

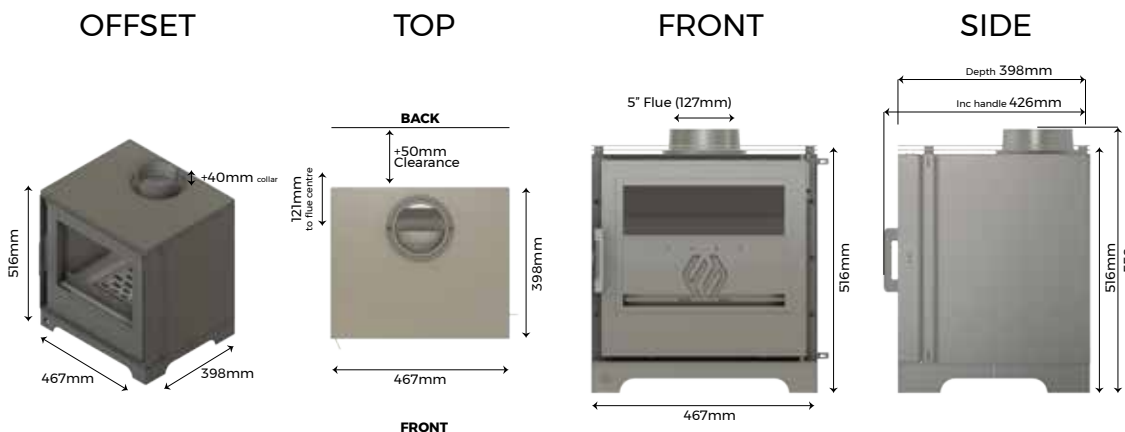

Crafted using the finest steel, designed and engineered by the best in Britain, the Thea 5s will not disappoint. With its stunning wide flame picture and clever use of both technology and design, this stove will delight and perform for years to come.
