Heating Range

Outdoor heating is a fantastic way to make the most of your commercial setting, garden or patio, allowing you to enjoy al fresco evenings and extended entertaining seasons.

By adding an outdoor heater to your space, you can introduce extra warmth and light.

Our selection of patio heaters includes both freestanding electric models and ceiling-mounted options.

The right choice for you will depend on your outdoor setup, with safety being the top priority. Consider how guests will move around the area when selecting your heater, ensuring it fits seamlessly into your space.

For ease of use, the Plush heater offers simple control with a remote, so you can adjust the temperature without getting up. With three heat settings, you can find the ideal level of warmth to keep your guests comfortable, perfect for extending your garden dinner parties or outdoor gatherings and commercial applications.

Durable and safe, this lamp-style heater comes with a 1.8m long cable for added flexibility. And with the handy remote control, you can easily adjust the heat from the comfort of your seat.

The PAD garden heater and lamp are ideal for extending your outdoor entertaining season. Standing at 210cm tall, the sleek stainless steel pole is topped with a wide 60cm lampshade in a modern design. Below, a frosted glass LED lamp casts a warm, romantic glow. Plus, you can choose between three heat settings: 900W, 1,200W, or 2,100W, ensuring just the right amount of warmth for your outdoor gatherings.

Heating Range
