Woodland LCD - The Charm of a Woodburning Stove, Reinvented by Paul Agnew Designs

The Woodland LCD Electric by Paul Agnew Designs redefines what an electric stove can be — a perfect fusion of craftsmanship, cutting-edge technology, and timeless style. Inspired by our award-winning Woodland woodburning stove, this electric model retains the traditional allure of a classic log burner while embracing the ease and efficiency of modern living.

Proudly designed and manufactured by Paul Agnew Designs, a recognised leader in the electric fireplace industry, the Woodland Electric showcases a new standard in quality and realism. Now featuring both advanced LED and the latest LCD flame technology, it offers an ultra-realistic flame effect, remarkable energy efficiency, and a depth of visual detail that brings the fireplace to life.

Exceptional Craftsmanship. Advanced Technology. Unmatched Ambience. With its expansive glass frontage and generously proportioned fire chamber, the Woodland Electric mirrors the form and presence of a true woodburning stove. A hand-finished, lifelike log set sits at the heart of the fire, surrounded by carefully crafted details that speak to decades of fireplace design expertise.

Whether installed in a traditional hearth setting or as a freestanding feature, the Woodland Electric is the ultimate blend of heritage design and next-generation innovation — delivering not only warmth, but a refined focal point for any room.
