

PAD 146 Features

- Exciting hyper-realistic flame pattern with six vivid LED flame colour options - Orange, Amber, Yellow, Amber-Orange, Yellow-Amber, and Orange-Amber-Yellow - allowing you to tailor the visual mood of the fireplace
- Five-level flame brightness control, enabling you to fine-tune the intensity of the flame to match your desired ambience
- Dynamic fuel-bed lighting, adding depth, realism, and a layered glow to the flame presentation
- Three adjustable heat modes offering year-round comfort - choose between fan-only ventilation, a gentle 750W warming mode, or a powerful 1.5kW heating option to suit your space
- Three flame-speed settings, giving you full control over the movement and energy of the flame display
- Integrated overheat protection system designed to ensure safe performance and long-term peace of mind
- Programmable timer ranging from 0.5 to 8 hours, providing convenient, automated operation for daily use
- Immersive fire-crackle sound effect that enhances the sensory experience and brings added warmth to the room
- Multiple control interfaces, including a handheld remote, intuitive LVD touch panel, and smart app connectivity for effortless operation
- Versatile installation flexibility, allowing the fireplace to be seamlessly integrated as either a wall-mounted feature or fully recessed for a clean, built-in architectural finish

PAD 146 Range dimensions

Elevate your interior with the PAD146, a contemporary electric fireplace that blends advanced flame technology with modern architectural styling. Whether showcased as a bold wall-mounted feature or recessed for a seamless built-in finish, it brings modern elegance and immersive ambience to any space.

The PAD146 features a hyper-realistic flame display with six vivid LED colour options, complemented by dynamic fuel-bed lighting and five levels of brightness to create a layered, lifelike glow. Three flame-speed settings allow you to shape the movement and energy of the display, tailoring the atmosphere to any moment.

Designed for year-round comfort, the PAD146 offers three heat modes — from fan-only ventilation to gentle 750W warmth and a powerful 1.5kW heating option. A programmable timer (0.5 to 8 hours) and an integrated fire-crackle sound effect further enhance the experience, bringing both convenience and sensory depth.

Safety and ease of use are built in, with an advanced overheat protection system and multiple control interfaces, including a handheld remote, intuitive LVD touch panel, and smart app connectivity. Combining innovation, ambience, and architectural versatility, the PAD146 is more than a fireplace - it's a statement of modern living.
